Profile

I have completed my **BCA** and am currently pursuing an **M.Sc. in Data Science**. I have a **strong foundation in programming with Python** and a good understanding of libraries such as **Pandas, NumPy, Matplotlib**, and **Seaborn** for **data analysis and visualization**. I'm also familiar with **Power BI** and **Excel** for **business reporting** and **dashboard creation**. I'm passionate about **exploring data, solving problems**, and contributing to **data-driven decision-making**.

Project

• Project 1: Real- Estate Sell and Rent Property Web Deployment

The **Real Estate Web Application** is built using PHP, HTML, CSS, Bootstrap, JavaScript, CodeIgniter, and MySQL for buying, selling, and renting properties. It includes secure user registration, login, and an admin panel for managing listings. Users can post properties with details like type, location, price, and images, while an advanced search system allows filtering by criteria. The responsive UI ensures seamless navigation across devices. CodeIgniter provides secure data handling, and AJAX enables dynamic updates. Future enhancements may include **payment integration, Google Maps API, chat system, and AI-based recommendations**. The platform offers an efficient solution for real estate management, making property transactions simple and user-friendly. **(The Project of make in BCA Final year)**

• PROJECT 2: SPOTIFY MUSIC & ARTIST SONG ANALYTICS DASHBOARD

I developed an interactive **Spotify Music Analytics Dashboard** in **Power BI** with a modern Spotify-styled UI and multi-page navigation, including Home, Overview, Artists, and Songs. The dashboard analyzes thousands of tracks to deliver insights on **popularity trends, artist performance, unique albums**, and **monthly listening patterns**. I used **Power Query** for data cleaning, **DAX** for advanced calculated metrics, and designed **custom visualizations** like bar charts, donut charts, and trend lines. It highlights key patterns such as **explicit vs non-explicit content, album types**, and **top-performing artists**. This project showcases strong skills in **data modeling, data visualization, UI design**, and **analytical storytelling**.

Skills & Abilities

- **Programming Languages:** Python
- **Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn, PyTorch, TensorFlow
- **Data Analysis & Visualization Tools:** **Power BI**, MS Excel
- **Tools & Technologies:** Visual Studio Code, Jupyter Notebook
- **Concepts:** Object-Oriented Programming (OOP), Data Analysis, Data Visualization

Education

- **12th- Gujarat Secondary & Higher Secondary Education Board Gandhinagar**
PERCENTAGE: **67% I.G. DESAI, SURAT** (2020 - 2022)
- **BACHELOR OF COMPUTER APPLICATION (BCA)**
CGPA: **7.10 VNSGU University, Surat** (2023 - 2025)
