OBJECTIVE

I have completed my BCA and am currently pursuing an **M.Sc. in Data Science**. I have a strong foundation in programming with Python and a good understanding of libraries such as **Pandas, NumPy, Matplotlib, and Seaborn** for **data analysis and visualization**. I'm also familiar with **Power BI and Excel** for business reporting and dashboard creation. I'm passionate about exploring data, solving problems, and contributing to data-driven decision-making.

EDUCATION

12 th - Gujarat Secondary & Higher Secondary Education Board Gandhinagar	2020 – 2022
Bachelor Of Computer Application	2022 – 2025
CGPA: 7.10 VNSGU University, Surat	

Experiences (Fresher: Major Projects)

Project: Customer Shopping Behavior Analysis (Python, SQL, Power BI)

Role: Data Analyst / Business Analyst

- This project analyzes customer shopping behavior using transactional data from 3,900 purchases across various product categories.
- Designed dashboards and visual reports using **Python, SQL, Power BI, Excel** to track service performance and customer satisfaction.
- The goal is to uncover insights into spending **patterns, customer segments, product preferences**, and subscription behavior to guide strategic business decisions.

Project: Spotify Music & Artist Analytics Dashboard (Power BI)

Role: Data Analyst

- I developed an interactive **Spotify Music Analytics Dashboard** in **Power BI** with including Home, Overview, Artists, and Songs.
- Designed dashboards and visual reports using **Power BI, DAX query, Excel** to analyze thousands of tracks to deliver insights on **popularity trends, artist performance, unique albums, and monthly listening patterns**
- This project showcases strong skills in **data modeling, data visualization, UI design**, and analytical storytelling.

Project: Uber Ride Analytics Dashboard (Power BI)

Role: Data Analyst

- The **Uber Analytics Dashboard** is a multi-page data visualization project designed to understand ride performance and business KPIs.
- Created visual reports and dashboards using **Power BI, Power query, Excel** to support business decisions. It **covers Home, Overview, Vehicle Insights, Revenue, and Profit pages**.
- Advanced visuals highlight completed vs incomplete rides, revenue distribution, and operational efficiency. And real-time ride monitoring through API integration.

CERTIFICATIONS

Data Analytics Job Simulation [Issued by Deloitte] • Main Focusing on practical data analysis using tools like Tableau, Excel Query	Nov - 2025
Data Analysis with Python [Issued by IBM] • Learn Data analysis Using Power BI tool, Data Cleaning, Data Visualization	Dec - 2025
Data Visualization with Python [Issued by IBM] • Skills: Data Analysis, Data Modeling, Data Visualization, Python library, Python	Dec - 2025
Data Science for Beginners [Board Infinity] • Focusing on Python library(Numpy, Pandas, Matplotlib, Seaborn) and Data Cleaning, Modeling	Dec- 2025

PROJECTS (Common)

IPL Data Analysis Dashboard [Power BI, DAX]

- Used Python for data cleaning, auditing, and exploratory data analysis (EDA) .
- Built interactive dashboards using Power BI to analyze sales performance, customer behavior and so more.

KPMG Data Analysis using Excel [Excel]

- This project analyzes a Udemy courses dataset to uncover insights about course performance, instructor engagement, course pricing, student enrollment patterns, and popular categories. It also highlights customer behavior trends and geographical distribution of learners.

Crypto Market Trends Performance Dashboard [Power BI]

This project develops an interactive dashboard to visualize key performance indicators (KPIs), track crypto performance, analyze financial metrics, monitor employee productivity, and provide insights into operational efficiency. The dashboard helps in making data-driven decisions and identifying business growth opportunities.

Amazon E-commerce Analysis Project [Power BI, Python]

This project analyzes the e-commerce dataset to uncover insights into sales performance, customer behavior, product popularity, and delivery efficiency. Conducted data cleaning and exploratory analysis using SQL and Python, and visualized key metrics in Power BI to support data-driven business decisions.

Retail Business Insights Project [Excel, Power BI, Python]

This project analyzes retail business data to provide insights into sales trends, customer purchasing behavior, product performance, inventory management, and regional sales distribution. It helps retailers make data-driven decisions to optimize sales, improve inventory turnover, and enhance customer satisfaction.

HR Analytics Project [DAX Query, Power BI, Python]

This project focuses on analyzing HR data to explore employee performance, attrition trends, and workforce demographics. Performed data cleaning and exploratory analysis using DAX and created Power BI dashboards to visualize insights that support HR decision-making and employee retention strategies.

Zomato Sales Analysis Project [DAX Query, Power BI, Excel]

This project analyzes zomato sales data to uncover key business insights such as top-selling products, peak order times, and customer purchasing trends. Performed data cleaning and exploratory analysis using DAX and Excel, and developed interactive Power BI dashboards to visualize sales performance and support data-driven decisions.

TECHNICAL SKILLS

Data Analysis

Statistical Analysis, Data Cleaning, Excel, data visualization

Database Management

Data Modeling, DBMS, Microsoft SQL Server, Visual Studio Code

Tools

SQL, Google Sheets, Excel, Tableau, Power BI

Programming Languages

Python

SOFT SKILLS

- Problem Solving - Attention to Detail - Time Management - Communication

LANGUAGE SKILLS

- English
- Hindi
- Gujarati
